

# Glyclean® D

## Formulations Available for Subregistration

### United States EPA Registered Formulations:

#### Glyclean Broad Spectrum Disinfectant and Cleaner

**EPA Registration Number: 71654-31 (Newly Approved)**  
**Active Ingredient Concentration: 5.5% Glyclean D70**

*Glyclean Broad Spectrum Disinfectant and Cleaner is excellent at disinfection with SARS-CoV-2 label claim, but still a strong enough cleaner to carry the “Cleans and Disinfects in one-step” claim. This simple and efficient formulation, beyond Glyclean D70, includes 0.5% of a naturally derived surfactant and NaOH for pH adjustment. Cost effective, excellent cleaning ability, and powerful user benefits makes this formulation a very attractive quat alternative.*

#### Glyclean Pine Cleaner

**EPA Registration Number: 71654-30**  
**Active Ingredient Concentration: 2.1% Glyclean D70**

*The Glyclean Pine Cleaner is a registered formulation with pine scent as an option amongst others. Use neat to clean and disinfect in one step or dilute to use as a cleaning only product.*

#### Glyclean Hard Surface Cleaner

**EPA Registration Number: 71654-5**  
**Active Ingredient Concentration: 5% Glyclean D70**

*The Glyclean Hard Surface Cleaner is a registered cleaner with a powerful surfactant package to easily cut through oil and grease and achieve excellent cleaning and disinfection in a single step. Registered label claim for SARS-CoV-2 virus.*

#### Glyclean Toilet Cleaner

**EPA Registration Number: 71654-2**  
**[Under reformulation]**  
**Active Ingredient Concentration: 9.5% Glyclean D70**

*Glyclean D70 excels at descaling and killing bacteria which is perfect for toilet bowls. This formulation is under reformulation to update and modernize the product.*

### Europe:

#### Glyclean Hard Surface Cleaner and Disinfectant

**National Registrations: Germany, France, United Kingdom**  
**BPR: Listed as a Representative Product in the EU BPR dossier**  
**Active Ingredient Concentration: 8.24% Glyclean D70E**

*The Glyclean Hard Surface Cleaner and Disinfectant formulation provides a sustainable active ingredient to take to market now, while providing long-term viability to thrive in the future BPR world.*
